FOR IMMEDIATE RELEASE

NAMCOR LAUNCHES LUBRICANTS INTO THE LOCAL MARKET

The National Petroleum Corporation of Namibia (NAMCOR) launched a range of diverse lubricants catering to various industries in the local Namibian market. The NAMCOR Lubricants range adhere to the highest specifications, ensuring the best possible product to cater to every mechanical need.

All NAMCOR Lubricants are based on base oils from Group II to group V, using a highly refined hydro processed technology allowing for the creation of high viscosity and intensity lubricants to ensure maximum efficacy. Included in the range are Semi Synthetic and Pure Synthetic lubricants.

The use of Group II base oil technology, as a minimum standard, provides numerous advantages when compared to competitor lubricants that are based on Group I technology. The technical advantages of the NAMCOR range of Lubricants include:

- Oxidation and thermal stability that reduces oil thickening, varnish, sludge and gum.
- Reduction of wear and maintenance requirements while increasing oil life, allowing extended oil drain periods.
- Water Separability - particularly important for systems such as in turbine oils, circulation oils and hydraulic fluids – extends lubricant life and prevents rust and corrosion.
- Air Release - all oils absorb air.
- Superior performance at a lower cost.

National Petroleum Corporation of Namibia Pty Ltd

1 Aviation Road, Petroleum House,
Private Bag 13196, Windhoek, Namibia.
